## 4 Panel Soffit

### The Goods on Soffit:

You may not realize it, but soffit and fascia play an important role in the structural integrity of your home. Properly installed soffit provides essential ventilation and air circulation to reduce excess moisture that can cause rotting and decay of the roof's structure. It promotes directional air movement through the eaves and rafters of your home, helping it to stay in great shape both inside and out.

**Vented \* IN STOCK \***

### Easy to Maintain:

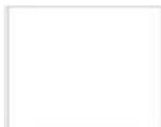

Replacing your existing soffit and fascia with a Gentek aluminum system is a smart investment. Designed with easy upkeep in mind, the high-performance finish won't blister, flake or peel, and the aluminum construction won't split, warp or rot from exposure to moisture, so you can forget about the maintenance or repair associated with wood products. Installation is a one-time job - once it's complete you will never have to think about it again!

Pieces per box ----- 18  
Square feet per box ----- 300  
Length per piece ----- 12' 2 3/8"  
Vent area per linear foot ---- 23.2 cm<sup>2</sup>  
3.6 sq.in/1ft
